Bachelor of Education in Mathematics

MODULE HANDBOOK

Module name:	History of Mathematics
Module level, if applicable:	Undergraduate
Code:	MAT6231
Sub-heading, if applicable:	-
Classes, if applicable:	-
Semester:	7 th
Module coordinator:	Dr. Ariyadi Wijaya, M.Sc.
Lecturer(s):	Dr. Ariyadi Wijaya, M.Sc., Ilham Rizkianto, M.Sc.
Language:	Bahasa Indonesia
Classification within the curriculum:	Compulsory Course
Teaching format / class hours per week during the semester:	100 minutes lectures and 120 minutes structured activities per week.
Workload:	Total workload is 90,67 hours per semester which consists of 100 minutes lectures, 120 minutes structured activities, and 120 minutes self study per week for 16 weeks.
Credit points:	2
Prerequisites course(s):	-
Course outcomes:	After taking this course the students have ability to: CO1. Respect peoples with different ideas. CO2. Identify relevance and/or contribution of mathematical concepts in ancient civilization to the modern mathematical concept. CO3. Communicating research ideas to solve mathematical problems both written and orally. CO4. Explaining mathematical concept developed in each civilization.

	CO5. Solving mathematical problem in the context of the History of Mathematics in several civilization.																											
Content:	In general, the subject of Mathematics History is intended to provide insight into the development of mathematical concepts from several civilizations. In this course we study about: mathematical systems; Babylonian and Egyptian numerical, Euclid and His Work (The Elements); Pythagoras and Descartes; Greek Mathematics; Chinese Mathematics; Indian Mathematics; Islamic Mathematics; Medieval European Mathematics, Algebraic History; Non-Euclidean Geometry Development; Calculus Development; and Development of Statistics and Probability Theory.																											
Study / exam achievements:	<p>Attitude assessment is carried out at each meeting by observation and / or self-assessment techniques using the assumption that basically every student has a good attitude. The student is given a value of very good or not good attitude if they show it significantly compared to other students in general. The result of attitude assessment is not a component of the final grades, but as one of the requirements to pass the course. Students will pass from this course if at least have a good attitude.</p> <p>The final mark will be weight as follow:</p> <table border="1"> <thead> <tr> <th>No</th> <th>CO</th> <th>Assessment Object</th> <th>Assessment Technique</th> <th>Weight</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>CO2</td> <td>Presentation</td> <td>Observation</td> <td>15%</td> </tr> <tr> <td rowspan="5">2</td> <td rowspan="5">CO2 CO3 CO4 CO5</td> <td>a. Individual Assignment</td> <td rowspan="5">Written test</td> <td>10%</td> </tr> <tr> <td>b. Group Assignment</td> <td>10%</td> </tr> <tr> <td>c. Quiz</td> <td>15%</td> </tr> <tr> <td>d. Mid</td> <td>25%</td> </tr> <tr> <td>e. Final exam</td> <td>25%</td> </tr> <tr> <td colspan="3">Total</td> <td>100%</td> </tr> </tbody> </table>	No	CO	Assessment Object	Assessment Technique	Weight	1	CO2	Presentation	Observation	15%	2	CO2 CO3 CO4 CO5	a. Individual Assignment	Written test	10%	b. Group Assignment	10%	c. Quiz	15%	d. Mid	25%	e. Final exam	25%	Total			100%
No	CO	Assessment Object	Assessment Technique	Weight																								
1	CO2	Presentation	Observation	15%																								
2	CO2 CO3 CO4 CO5	a. Individual Assignment	Written test	10%																								
		b. Group Assignment		10%																								
		c. Quiz		15%																								
		d. Mid		25%																								
		e. Final exam		25%																								
Total			100%
